SPECIFICATIONS

Nest™

APPLICATIONS:

All products in the Nest series are recommended for interior use only. The glossy finish is best suited for vertical applications such as backsplashes, walls, shower walls, etc. It is not recommended that this product be used on floors or countertops.

PROPERTIES:

As with all handmade tile, Nest is subject to variation in shade and size, so a minimum grout joint of 3/16" is recommended. Nest tiles may craze over time. Crazing is part of the beauty of handmade ceramic tile and is not a product defect. It does not compromise the product's strength or stability.

INSTALLATION

It is important to select a qualified installer with experience installing the materials specified. All materials should be inspected and approved before installation. Installation constitutes acceptance of the product. For specific installation instructions, consult the *Handbook for Ceramic Tile Installation* from the Tile Council of North America, Inc.

To ensure satisfactory results, it is recommended that all materials be blended and laid out prior to installation. For long-term maintenance and beauty, all Nest products should be properly sealed with the appropriate tile and grout sealer. For lasting beauty and performance, it is recommended that the product is sealed periodically throughout the life of the installation.

CARE AND MAINTENANCE

Most general cleaning can be done with a non-abrasive cloth and a pH-balanced cleaner. Cleaning products containing chlorine and ammonia should be avoided, as they could etch the surface of the tile. For additional general cleaning questions, contact a Renaissance Tile & Bath design consultant for further information.
